

INTRODUCTION

IP2Location™ is an award-winning solution to help you to identify visitor's geographical location, for example country, state/region, city, latitude, longitude, ZIP code, time zone, connection speed, ISP and domain name, IDD country code, area code, weather station code and name using a proprietary IP address lookup database and technology without invading Internet user's privacy. We have made it so easy -- just search an IP address from the IP2Location database. The IP mapping technology accurately pinpoints the location of an IP address using a local RDMS system or components such as MySQL, MS SQL, PL/SQL, .NET or others. Our databases are being used and proven by many Fortune 500 companies.

If you still have doubt whether our database is suitable for your project, take a look at some successful projects using our products. Developers around the world have been implementing the following projects using the IP2Location™ products.

Credit Card Fraud Detection

- Identify suspicious Internet order to reduce fraud and chargeback
- Avoid orders from high risk countries

Advertising and Marketing

- Display unique banner based on locations to improve click-through rate
- Distribute marketing messages based upon the users geographic location

Content Customization

- Redirect visitors to appropriate web pages based location and cultural
- Customize web page content to adopt visitor local context immediately

Network Security

- Disallow network connection from unauthorized countries
- Identify origin of network

Credit Digital Rights Management

- Broadcast digital contents to subscribers within a region to safeguard valuable intellectual property
- Contents customization or censor based on subscriber's origin, cultural and law

Gaming, Lotteries and Legal

- Track user's IP addresses to ensure compliance with national and international laws
- Calculate correct tax collection fee based on country and region

Innovations using IP2Location™

- ✓ Display native language and currency
- ✓ Redirect web pages based on geographical
- ✓ Digital Rights Management
- ✓ Prevent password sharing and abuse of service
- ✓ Reduce credit card fraud
- ✓ Web log statistics and analysis
- ✓ Auto-selection of country on forms
- ✓ Geo targeting for increased sales and click-through
- ✓ Spam filtering by location

Benefits:

- ✓ Low Price
- ✓ Monthly Update
- ✓ Download Data Immediately
- ✓ Corporate Site License
- ✓ Available in Several Database Formats
- ✓ Support in Several Platforms

Data Product Features:

- Support all 4,294,967,296 IP addresses in IPv4
- Average 5% of database updated monthly to improve accuracy
- Database download 24x7
- Database format suitable for all popular RDMS systems such as MySQL, MS-SQL, Oracle, Sybase, Access and DB2
- Unlimited email technical support

Data Product Requirements:

- Minimum free disk space required is 5MB (DB1) or 50MB (others)
- Any RDMS database system that supports CSV (comma separated value) import file or .NET Framework
- Any programming/scripting language that supports dynamic database connection and query
- Any operating system that supports programming language and database as mentioned earlier

Supported Platforms:

Customer Testimonials:

"No doubt why security expert, Mike Schiffman, author of the Hacker's Challenge book series recommended IP2Location™ in IP Geo project".

S. Jones, California (United States)

"I am very satisfied with my purchase for my IP address log analysis project. Got my account immediately right after order approved. No hassle or delay time at all as I always thought. A must to meet project deadline".

J. Wagner, New York (United States)

"Innovative products with low price tags compared with others million dollars geo-targeting products".

Balakrishnan, Bangalore (India)

DATA PRODUCT PACKAGES

[DB1]
IP2Location™ IP-Country Database

Production Description:

DB1 database package provides all IP address ranges with their country of origin. It is suitable to identify visitor's country by IP address. There are more than 120,000 recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$49/Server**

[DB2]
IP2Location™ IP-Country-ISP Database

Production Description:

DB2 database package provides all IP address ranges with their country of origin and Internet Service Provider (ISP) names. It is suitable to identify visitor's country and also ISP by IP address. There are more than 6 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$199/Server**

[DB3]
IP2Location™ IP-Country-Region-City Database

Production Description:

DB3 database package provides all IP address ranges with their country of origin, state or region and city names. It is suitable to identify visitor's country, region/state and city by IP address. There are more than 2.8 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$199/Server**

[DB4]
IP2Location™ IP-Country-Region-City-ISP Database

Production Description:

DB4 database package provides all IP address ranges with their country of origin, state or region, city and ISP names. It is suitable to identify visitor's country, region/state, city and also ISP by IP address. There are more than 6.9 million recordsets in this database.

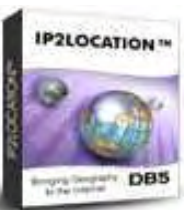

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$349/Server**

[DB5]
IP2Location™ IP-Country-Region-City-Latitude-Longitude Database

Production Description:

DB5 database package provides all IP address ranges with their country of origin, state/region, city names, cities latitude and longitude. It is suitable to identify visitor's country, region/state, city, latitude and longitude by IP address. There are more than 2.8 million recordsets in this database.

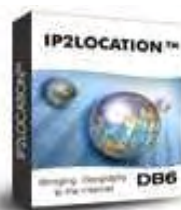

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$349/Server**

[DB6]
IP2Location™ IP-Country-Region-City-Latitude-Longitude-ISP Database

Production Description:

DB6 database package provides all IP address ranges with their country of origin, state/region, city names, cities latitude, longitude and ISP. It is suitable to identify visitor's country, region/state, city, latitude, longitude and ISP by IP address. There are more than 6.9 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$499/Server**

[DB7]

IP2Location™ IP-Country-Region-City-ISP-Domain Database

Production Description:

DB7 database package provides all IP address ranges with their country of origin, Internet Service Provider (ISP) names, region/state and domain name. It is suitable to identify visitor's country, region, city, domain name and also ISP by IP address. There are more than 6.9 million recordsets in this database.

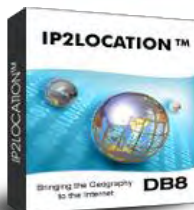

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$499/Server**

[DB8]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-ISP-Domain Database

Production Description:

DB8 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, domain name and ISP. It is suitable to identify visitor's country, region/state, city, latitude, longitude, domain name and ISP by IP address. There are more than 6.9 million recordsets in this database.

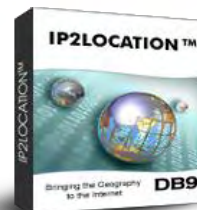

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$649/Server**

[DB9]

IP2Location™ IP-Country-Region-City-Latitude-Longitude- ZIPCode Database

Production Description:

DB9 database package provides all IP address ranges with their country of origin, state/region, city names, cities latitude, longitude and ZIP Code. There are more than 2.8 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$499/Server**

[DB10]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-ZIPCode-ISP-Domain Database

Production Description:

DB10 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, domain name, US ZIP Code and ISP. There are more than 6.9 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$799/Server**

[DB11]

IP2Location™ IP-Country-Region-City-Latitude-Longitude- ZIPCode Timezone Database

Production Description:

DB11 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, US ZIP Code and time zone. There are more than 2.8 million recordsets in this database.

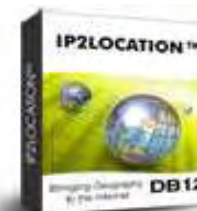

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$649/Server**

[DB12]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-ZIPCode-Timezone- ISP-Domain Database

Production Description:

DB12 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, ZIP Code, time zone, ISP and domain name. There are more than 6.9 million recordsets in this database.

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$949/Server**

[DB13]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-TimeZone-Netspeed Database

Production Description:

DB13 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, time zone and connection speed. There are more than 2.8 million recordsets in this database.

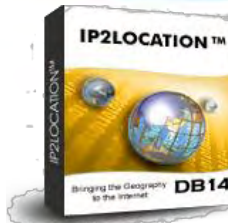

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$649/Server**

[DB14]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-ZIPCode-TimeZone-ISP-Domain-Netspeed Database

Production Description:

DB14 database package provides all IP address ranges with their country of origin, region, city names, cities latitude, longitude, US ZIP Code, time zone, ISP, domain name and connection speed. There are more than 6.9 million recordsets in this database.

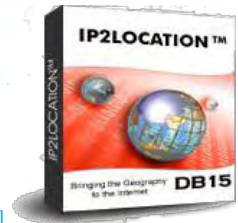

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$1099/Server**

[DB15]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-TimeZone-AreaCode Database

Production Description:

DB15 database package provides all IP address ranges with their own country of origin, region, city names, cities latitude, longitude, time zone, area code. There are more than 2.8 million recordset in this database.

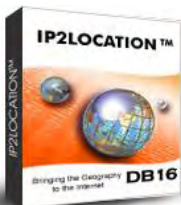

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$799/Server**

[DB16]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-ZIPCode-Timezone-ISP-Domain-Netspeed-AreaCode Database

Production Description:

DB16 database package provides all IP address ranges with their own country of origin, region, city names, cities latitude, longitude, US ZIP code, time zone, ISP, domain name, connection speed IDD code, and area code. There are more than 6.9 million recordset in this database.

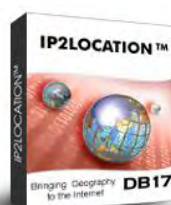

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$1249/Server**

[DB17]

IP2Location™ IP-Country-Region-City-Latitude-Longitude-Timezone-Netspeed-Weather Database

Production Description:

DB17 database package provides all IP address ranges with their own country of origin, region, city names, cities latitude, longitude, time zone, connection speed, and weather station code and station name. There are more than 2.8 million recordset in this database.

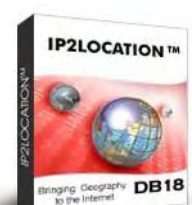

Subscription Period:

One year with Monthly Update

License:

Per Physical Server Basis

Price: **US\$799/Server**

[DB18]

IP2Location™ IP-Country-Region-City-Latitude-Longitude- ZIPCode-Timezone-ISP-Domain-Netspeed-AreaCode-Weather Database

Production Description:

DB18 database package provides all IP address ranges with their own country of origin, region, city names, cities latitude, longitude, ZIP code, time zone, ISP, domain name, connection speed, IDD code, area code, weather station code and station name. There are more than 6.9 million recordsets in this database.

IP2Location™ Java Component

Production Description:

IP2Location Java Component is a software development component and data solution for Java platforms that is using a fast and self-contained lookup engine with local BIN file database.

The IP2Location Java Class Libraries may be used on any platforms with a Java Virtual Machine:

- Windows®
- HP/UX
- OS/390
- LINUX
- Solaris
- MacOS
- AS/400

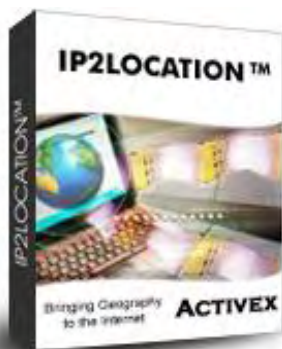

Developers integrate geolocation by IP address into the Internet applications, websites or custom Java applications with JDK 1.1 or above.

IP2Location™ ISAPI Filter

Production Description:

IP2Location ISAPI Filter is an Internet Server Application Programming Interface (ISAPI) plug-in that can be used with any web servers running IIS and compatible with ASP, ASP.NET, ColdFusion, PHP, CGI, PERL and most JSP application server environments.

Features:

- ✓ Reduce frauds by blocking visitors.
- ✓ User-friendly environment provided by originating language and currency
- ✓ Avoid image leeching servers
- ✓ Avoid hotlinking and bandwidth theft

IP2Location™ IP-Country Web Service

Price: USD\$49/Year

Production Description:

IP2Location™ IP-Country web service is providing a remote hosted service to reverse lookup of IP address to ISO3166 country code.

Features:

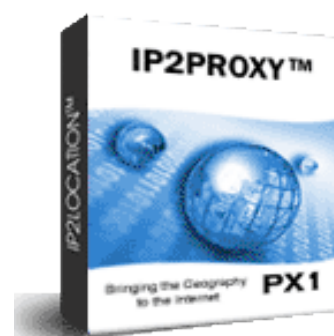

- ✓ No database to download, to install or to upgrade in the server side
- ✓ Support HTTP queries up to 100,000 times or 1 year (which one comes first)

IP2Proxy™ IP-Country

Price: USD\$399/server

Production Description:

IP2Proxy™ is a simple Web solution that simplifies anonymous proxy server detection and makes it as simple as querying the IP address from a local database. IP2Proxy™ detection algorithm is using a massive number of servers and ports scanning of all IP address ranges in parallel to detect anonymous open proxy servers which are actively in use. The IP address gets re-allocated frequently and the proxy server detection technology needs to be updated regularly.

Features:

- ✓ Fresh daily update of proxy database
- ✓ Automate download process by script
- ✓ Database in text CSV (Comma Separated) format
- ✓ One year subscription (365 days)
- ✓ Supports all server platforms and programming languages

Benefits:

- ✓ Reduce online credit card fraud for merchants
- ✓ Avoid identity theft
- ✓ Protect computer system from anonymous access
- ✓ Reduce click fraud attempts

COMPANY BACKGROUND

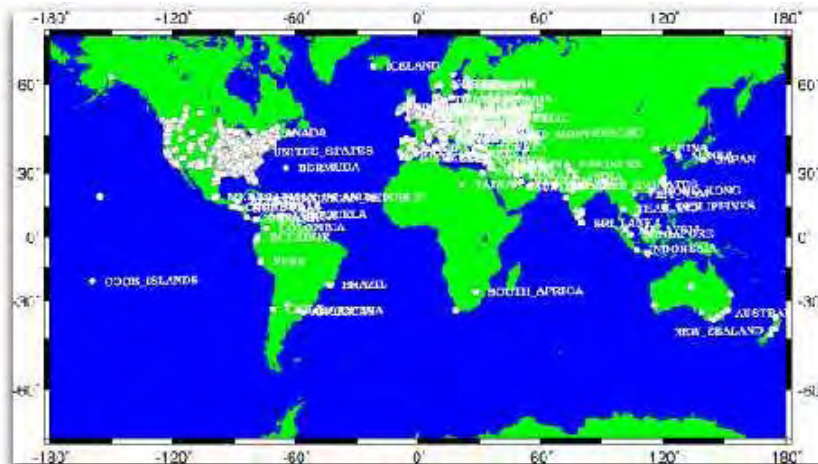

IP2Location.com is a subsidiary of Hexasoft Development Sdn. Bhd., an offshore R&D company headquartered in Penang, Malaysia. The company provides innovative software solutions and services that help businesses understand their customers better for effective marketing and supports. After several years of intensive research, data collection and development, we delivered the award-winning IP2Location™ geolocation services to target the Internet community. Our technology complements well-known shortcoming of Internet Protocol in identifying geographical location of every IP address.

Our Products and Services:

IP2Location™ connects your customers' Internet presence to their physical locations, helping you deepen and secure your relationships with your customers. IP2Location™ is available in multiple granularities and format. It is currently being used by most computing platforms in the market. Please visit our products section for more information about our offerings.

Our Customer:

As a leading provider of IP address geolocation service, we have thousands of customers from different locations in the world. Here is a snapshot of where some of our customers are located around the globe.

Contact Us:

To learn more about our product and service offerings, please contact us through email sales@ip2location.com. This is the easiest and most direct way to contact us via the Internet. We have multiple regional offices to serve our customers better.
